

We have exciting news to share...a brand-new one-of-a-kind playground for children of all abilities is coming to Monterey County in Toro County Park, brought to you by the Tatum's Garden Foundation! But...we need your help!

The new playground will follow a nature-inspired, woodland theme, reflecting the rich resources and history native to Toro County Park. When designing a playground, who better to ask for design advice than the kids who will play there?

Today, YOU are the expert playground designer, and we would like you to draw a picture or tell us about your dream playground...how would you create play structures that reflect nature and playing outdoors, and feature wildlife, plants, and the landscape of Toro Park? Your ideas could be incorporated into the final playground design!

Please complete your drawing and/or written ideas and return to your teacher. We will share it with the design experts, and your artwork will be on display during our Design Day Unveiling Celebration Event on May 19th, and online.
